Other non-standard Colorsteel® colours are available, subject to availability and minimum order quantities, extended order and manufacturing timeframes, and may incur additional charges.

● Available ▭ Available with Dridex TSR: Total Solar Reflectance LRV: Light Reflectance Value

*PVC downpipes are available in the following colours: White, Black, Flaxblack, Grey Friars, Ironsand, Gull Grey.

†0.55 6 Rib is available on request, subject to availability and minimum order quantities, extended order and manufacturing timeframes, and may incur additional charges.

‡Shaded profiles are available with Dridex in all colours except ZINCALUME®.

^All flashings are manufactured using 0.4 mm steel.

The colours shown in this brochure are as close as normal printing processes allow and should be viewed under exterior lighting conditions. ZINCALUME® is a zinc/aluminium alloy coated steel that gives significantly longer service life than a galvanised coating; the colour in this chart is an artist's impression only. To see exact COLORSTEEL® pre-painted steel samples, please contact your local Totalspan team.

SEE THE COLOURS IN PERSON

Your local Totalspan team can show you real samples and help you find the right fit.
